PROJECTS

Truth Chain *Next.js, Tailwind CSS, Framer Motion, Lenis Scroll* **Live**

- Built the frontend for a decentralized fact-recording platform developed during a Web3 hackathon.
- Designed a futuristic, dark-themed UI with smooth animations and scroll effects using Framer Motion and Lenis.
- Integrated with Solana-based smart contracts to fetch and display cryptographically verified facts and sources.
- Collaborated closely with teammates to ensure seamless UX within tight hackathon deadlines.

KeepIt *TypeScript, React.js, Recoil, framer-motion, Tailwind CSS, Node.js, Express.js, MongoDB* **GitHub Live**

- Built a tool to save and organize links, notes, and other content for quick access anytime.
- Created a futuristic UI with real-time state management using Recoil and responsive layouts via Tailwind.
- Enabled users to group saved items into custom-tagged "Stash" collections for fast filtering.
- Secured routes with JWT auth and enforced strict input validation using Zod.

TeachHub *JavaScript, Tailwind CSS, React.js, Node.js, Express.js, MongoDB* **GitHub**

- Developed a full-stack course marketplace with secure user and teacher authentication.
- Built optimized RESTful APIs, reducing response time by 40% through efficient route handling.
- Applied Zod validation to sanitize inputs and maintain consistent backend data quality.
- Designed a performant MongoDB structure to handle thousands of records with fast querying.

Portfolio Website *HTML, CSS, JavaScript* **GitHub Live**

- Built a responsive portfolio to showcase personal projects and skills.
- Integrated smooth animations and transitions to enhance user engagement.
- Designed layouts optimized for seamless viewing on desktop and mobile.
